

Workshop on metabolic disorders-PEDICON 2010

Metabolic disorders are common problems encountered by the paediatricians. These are frequently confusing and are disliked by postgraduates and practicing paediatricians alike. The questions on metabolic disorders are a favorite with the examiners but a nightmare for the students. A clear understanding is essential for proper management. This workshop will go a long way in giving a proper insight into these disorders.

The theme of the workshop “Metabolic disorders - a bore no more!!”

Highlights of the workshop

- No didactic lectures
- Focus on only the practical approach to the metabolic disorders so that each candidate attending the workshop would be able to tackle any metabolic problem with ease.
- Approach to each disorder will be in 5-7 simple steps only which can be easily remembered and practiced.
- Each step will be explained by proper case scenarios so that each participant can understand the approach clearly
- All speakers are very experienced teachers
