

Information & Communication Technology (ICT) in healthcare is buzzing, expanding, demanding & here to stay for long. The felt need of the hour is to learn and adopt this for our professional and personal needs urgently. The advantages are many but with busy and hectic life of pediatricians, it's imperative to address these issues soon. Hence to cater for **new users and senior pediatricians** a day's workshop is organized to give a glimpse and hands – on patient centric environment in a participatory approach. Doing mini projects and Case -studies with the experienced field faculty as guides for the day is planned. The topics have been selected to interest to wide variety of demands of Pediatricians, Clinic or Hospital-based. Focusing on the theme selected in enhancing personal and professional lives through IT. The workshop is open for registered delegates of Main Conference on first come-first serve basis, as there are limited seats of 50 only. Please register early to avoid disappointments. The following is the tentative topics and program of the workshop.

The Pre Conference workshop on computers for Pediatricians, during PEDICON 2010
